CAREER OBJECTIVE

Computer Science (Artificial Intelligence) undergraduate with strong foundations in Machine Learning, Data Structures, Algorithms, and Software Engineering. Passionate about applying AI, data analysis, and scalable systems to solve real-world problems. Seeking an Applied Sciences Internship to contribute to intelligent products through machine learning and data-driven solutions.

EDUCATION

B.Tech in Computer Science and Engineering (Artificial Intelligence)	2024-2028
Pranveer Singh Institute of Technology, Kanpur	CGPA: 8.47/10

SKILLS

Languages	Python, Java, JavaScript, SQL, C
Machine Learning	Scikit-learn, Pandas, NumPy, Data Preprocessing, EDA, Feature Engineering, Model Evaluation
Development	React.js, Node.js, Express.js, REST APIs, MongoDB
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design
Tools	Git, GitHub, VS Code, Jupyter Notebook, Postman

EXPERIENCE

Machine Learning Intern — FlyRank AI	July 2026 - Present
- Applied Machine Learning techniques using Python, Pandas, NumPy, and Scikit-learn for data preprocessing, feature engineering, model evaluation, and performance optimization on real-world datasets. - Performed exploratory data analysis (EDA), data cleaning, and data visualization to improve data quality and support machine learning model development. - Developed AI-powered workflows using Large Language Models (LLMs), REST APIs, and scalable automation pipelines, improving processing efficiency by 20% and reducing manual effort by 15%.	

PROJECTS

NextStep AI (AI-Powered Career & Learning Platform)	GitHub — May 2026
- Developed a full-stack AI-powered career platform using the MERN Stack with scalable backend architecture, secure authentication, and database integration. - Designed and implemented 15+ RESTful APIs for recommendation systems, progress tracking, authentication, and scalable application workflows. - Integrated Large Language Model (LLM) APIs for resume analysis, interview preparation, and personalized recommendation systems.	
NyaySetu (AI-Powered Legal Assistance Platform)	GitHub — Dec 2025
- Built a scalable MERN-based legal assistance platform with Role-Based Access Control (RBAC), secure authentication, and modular backend architecture. - Developed scalable backend services for concurrent request handling, API communication, performance optimization, and efficient data processing. - Integrated Socket.IO and an AI-powered legal chatbot using LLM APIs for intelligent query resolution and real-time communication.	

CERTIFICATIONS

• Google AI Essentials	Coursera
• Machine Learning Specialization by Andrew Ng	Coursera
• React.js, Node.js & Express.js	Simplilearn
• Introduction to SQL	Simplilearn

ACHIEVEMENTS

- Solved **500+** Data Structures and Algorithms problems on **LeetCode** and **HackerRank**, strengthening algorithmic thinking and problem-solving skills.
- Built and deployed **5+** AI-powered and full-stack applications using Machine Learning, REST APIs, and scalable backend systems.
- Contributed to open-source projects through **GirlScript Summer of Code (GSSOC)**, collaborating with teams using Git and GitHub.
