CAREER OBJECTIVE

Computer Science student with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Software Engineering. Seeking a Software Engineering Internship to apply problem-solving skills, contribute to scalable software solutions, and collaborate in building reliable and high-performance products.

EDUCATION

B.Tech in Computer Science and Engineering (Artificial Intelligence)

2024-2028

Pranveer Singh Institute of Technology, Kanpur

CGPA: 8.63/10

SKILLS

Programming Languages	Java, C, Python, JavaScript
Web Development	HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs
Database	MongoDB, MySQL
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Computer Networks
Tools & Technologies	Git, GitHub, VS Code, Postman
Soft Skills	Problem Solving, Team Collaboration, Communication, Time Management

EXPERIENCE

Machine Learning Intern — FlyRank AI

June 2026 - Present

- Contributing to Machine Learning and Software Development projects using Python, Pandas, NumPy, and Scikit-learn for data preprocessing, feature engineering, model evaluation, and performance optimization, improving data processing efficiency by 20%.
- Performing exploratory data analysis (EDA) and data visualization to identify patterns, trends, and actionable insights for model development and optimization.
- Working on AI/LLM-powered solutions, REST API integrations, scalable workflow automation, and monitoring workflows, improving system efficiency and reducing manual effort by 15%.

PROJECTS

NextStep AI (AI-Powered Career & Learning Platform)

[GitHub](#) — May 2026

- Developed a full-stack MERN-based software platform with scalable backend architecture, RESTful APIs, secure authentication, and database integration for personalized career guidance and learning recommendations.
- Designed and implemented 15+ REST APIs for feature development, user requirement fulfillment, progress tracking, and system integration, improving backend maintainability, scalability, and reliability.
- Integrated AI-powered modules for resume analysis, interview preparation, and recommendation systems using LLM APIs to deliver personalized user experiences.

NyaySetu (AI-Powered Legal Assistance Platform)

[GitHub](#) — Dec 2025

- Engineered a scalable MERN-based platform with role-based access control (RBAC), secure authentication, and modular backend architecture designed for performance, reliability, and future scalability.
- Designed scalable backend services for concurrent request handling, efficient data processing, reliable API communication, and performance optimization, ensuring high availability and seamless system integration.
- Implemented real-time communication using Socket.IO and developed an AI-powered chatbot for automated legal assistance, intelligent query resolution, monitoring user interactions, improving observability, and enhancing overall system reliability.

CERTIFICATIONS

Google AI Essentials	Coursera
Machine Learning Specialization by Andrew Ng	Coursera
React.js, Node.js & Express.js	Simplilearn
Introduction to SQL	Simplilearn

ACHIEVEMENTS

- Solved **500+** Data Structures and Algorithms problems on **LeetCode** and **HackerRank**, strengthening problem-solving, algorithm design, and software engineering fundamentals.
- Developed and deployed 5+ full-stack and AI-powered projects, applying software engineering principles, scalable backend development, REST API design, and database management.
- Contributed to open-source projects through **GirlScript Summer of Code (GSSOC)**, collaborating in team-based development environments and following software engineering best practices using **Git** and **GitHub**.
