Education

Pranveer Singh Institute of Technology, Kanpur

2024 – 2028

B.Tech in Computer Science and Engineering (Artificial Intelligence)

CGPA: 8.47 / 10

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, System Design

Experience

FlyRank AI

July 2026 – Present

Machine Learning Intern

Remote

- Built ML pipelines using **Python, Pandas, NumPy, and Scikit-learn** for preprocessing, feature engineering, training, and evaluation, improving pipeline efficiency by **20%**.
- Trained and evaluated machine learning models on **10K+ records**, performing exploratory data analysis and optimization to improve model performance and reliability.
- Integrated **Hugging Face APIs and AI/LLM models** into application workflows, reducing manual processing effort by **15%**.

Projects

NexHire AI – AI-Powered Interview Platform | *Flask, MongoDB, NLP, LLM, GenAI, RAG, OpenAI, Whisper*

[GitHub](#)

- Developed **NLP-based resume processing** to extract and normalize candidate skills, technologies, and relevant experience into structured profiles for role-specific interview planning.
- Used **LLM + GenAI** for dynamic question generation, adaptive follow-ups, structured answer evaluation, personalized feedback, interview summaries, and improvement recommendations.
- Engineered a **RAG pipeline with embeddings** to retrieve relevant role and interview knowledge as LLM context, using candidate **memory and deterministic routing rules** to control the adaptive interview flow.

CardioGuard – Multimodal Cardiac Risk Prediction System | *FastAPI, Scikit-learn, TensorFlow, Keras, PyTorch*

[GitHub](#)

- Built an **AI-driven cardiac risk prediction system** combining **clinical features and ECG signal analysis** with a FastAPI-based inference backend for real-time prediction and analysis.
- Implemented and evaluated **Random Forest, XGBoost, 1D CNN, BiLSTM, CNN-LSTM, Transformer, and PCA-based Autoencoder** models for clinical risk prediction, ECG classification, temporal pattern analysis, and anomaly detection.
- Designed a **multimodal risk fusion pipeline** combining clinical and ECG model outputs to generate unified cardiac risk scores, with ECG inference providing **confidence, heart rate, signal quality, and anomaly scores**.

Technical Skills

Languages: Python, Java, C

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

Backend & APIs: FastAPI, Flask, REST APIs, API Development, API Integration, SDK Integration

Databases: MongoDB, MySQL, PostgreSQL

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, EDA, Model Training, Model Evaluation

Deep Learning: Neural Networks, CNN, RNN, LSTM, Computer Vision

Python & ML Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, OpenCV, NLTK

Generative AI: LLMs, RAG, NLP, Embeddings, Vector Search, Hugging Face, OpenAI API, Prompt Engineering, Context Engineering

Agentic AI: LangChain, LangGraph, Multi-Agent Systems, Agent Orchestration, Tool Calling, Function Calling, AI Agents

Cloud & AI Platforms: AWS, AWS Bedrock, Google Cloud, Vertex AI, Azure, Cloud AI Services

Data Engineering: ETL, Data Pipelines, Data Preprocessing, Data Validation, Metadata Management, Data Catalogs, Ontologies

DevOps & Security: Docker, CI/CD, Git, GitHub, Secure Coding, Environment Configuration

AI Infrastructure: MCP, Model Integration, LLM APIs, AI/Agentic Platforms, Vector Databases

Tools: VS Code, Postman, Jupyter Notebook, Google Colab, Vercel

Certifications

Machine Learning Specialization – DeepLearning.AI & Stanford University

[Coursera](#)

AI Essentials – Google

[Coursera](#)

Achievements

- **Solved 600+ Data Structures and Algorithms problems**, strengthening problem-solving and algorithmic thinking across core DSA concepts. [Leetcode](#)
- Participated in the **Bharatiya Antariksh Hackathon 2026** organized by **ISRO**, where I developed and submitted a **prototype solution** addressing the hackathon problem statement.
